

## PRESS RELEASE 28 JUNE 2022

### Wakaminenga Hauora Health Council of Aotearoa (WHC) attacked by the Ministry of Health (MOH)

We the living men and women of the WHC and NZDSOS standing in our collective sovereign capacity state that the Ministry of Health (MOH), after steadfastly refusing to acknowledge the reality of Māori jurisdiction, [Tikanga as one of the two streams of law in this country](#) and failing to fulfil their obligations to Te Tiriti o Waitangi, has launched, via its DIRECTOR-GENERAL, an unlawful attack against the Wakaminenga Hauora Health Council of Aotearoa and those who have worked so hard to provide a path for qualified health professionals to practice their chosen profession under Māori jurisdiction. Amazingly We the living men and women that formed the WHC have done so voluntarily without expectation of any financial gains, purely to assist qualified health practitioners that were coerced and forced to breach their ethical obligations regarding informed consent and respect of freedom of choice for medical treatment.

The MOH as the administrator of the statute HPCA Act 2003 has directly or via its various HPCA entities repeatedly coerced qualified health practitioners and forced many of them to get multiple mRNA injections, now proven to lack effectiveness and [safety](#), to be able to continue providing in person services to their patients. The MOH via its DIRECTOR-GENERAL is ignoring Tikanga customary law and targeting a sovereign hapu based health authority which stands within Tino Rangatiratanga Mana Motuhake.

The DIRECTOR-GENERAL while promoting pharmacological solutions is suppressing alternative treatments and ignoring evidence such as the great benefit of good [Vitamin D levels](#) as protection against viruses. These actions have thus caused significant physical and/or psychological harm to countless health practitioners and their patients/clients. The MOH also delivered a significant propaganda campaign using non peer reviewed science to create fear and uncertainty. Their policies have led to death and disability (as reported by Medsafe), major inflation, debt, and disarray in the health sector and in the economy in general, while hospitals are experiencing serious shortages of health professionals.

The MOH has now trampled any semblance of objectivity as they continue to pursue an agenda that is increasingly in contradiction with the published science whether is it about the mRNA injections, the mask mandates, or the ineffective lockdowns.

After months of attempting to have a rational debate based on the scientific evidence, most have concluded that it is pointless as the few “experts” at the MOH claim to know best and to monitor the latest scientific evidence while ignoring the science that does not support their chosen agenda and turning a blind eye to the alarming warning signs in the health sector and the general population.

Wakaminenga Hauora Health Council of Aotearoa, its administrators and the living men and women of NZDSOS will continue to uphold the rights of practitioners to provide their services to hapu and all

communities in respect of Tikanga and Universal Law as a new experience and interaction between health professionals and the living men and women of Aotearoa (New Zealand) - A prosperous nation based on the respect of free will and the personal responsibility that derives from its application.

WHC and NZDSOS stand by the rights of any healthcare practitioner (HCP) to deliver a service and practice for all living communities across Aotearoa. We support free and open communication amongst HCPs and their patients enabling them their right to practice freely under Māori jurisdiction, the Confederation of Chiefs of the United Tribes and Universal Principles of Natural Law. The Wakaminenga Hauora Health Council of Aotearoa and NZDSOS is thus calling the attention of all living men and women of our nation to protect our God given rights.
